CALLED HIM LATELY?

Probably not—you rarely need telephone repair service these days

It wasn't too many years ago, was it, when calling the telephone repairman was a pretty common event? Nowadays you need his services once in a blue moon (average: 2½ years).

Actually, the less you need repair work, the better we like it. It means that telephone service is becoming ever more reliable. And that's the first job of the 25,500 men and women of New Jersey Bell.

Should you need him... you'll find a telephone repairman like George B. Crowell, Red Bank, on the job fast. Just dial 611 or call Repair Service.

BAKED pork chops can be interesting fare if they're served with stuffing balls in place of the traditional stuffing. They're more easily prepared, too. Combine bread crumbs with sautéed onion, melted butter, salt, pepper and thyme to taste. Shape into balls and bake right along with the meat.

★ AUTHOR OF "HOW TO STOP WORRYING AND START LIVING" ★

THESE few lines of Mrs. Lora Burriss, 3515 Metropolitan Avenue, Kansas City, Kansas, are filled with inspiration. When their family physician told them that her husband would always be a heart invalid, they were shocked and hurt, feeling that Life was unfair to them. For two months they worried during the day and slept fitfully at night. Then they decided that regardless of the doctor's diagnosis and decision, no one could possibly know when their Maker would take anyone into His fold. Then they came to another decision. That it isn't how long you live but how you live. Now they began living each day as if they never expected to live another. They didn't put off until tomorrow saying the things each knew the other one wanted to hear, and doing the little things to make each other happier.

Those practices, she says, resulted in their having nine of the happiest years ever given to anyone to experience. And she looks back at those nine years as being filled with more happiness than most married couples have in fifty years.

IT HAPPENED IN KANSAS
The horse ambled along for a short distance and then stopped. This procedure was repeated several times. A curious bystander approached the farmer and asked kindly, "Is your horse sick?" "Nope," answered the farmer; "he's so afraid I'll say 'whoa' and he won't hear me, that he stops every once in a while to listen."
